Imagine the Possibilities

Be a Futurist

Earn a Master of Science in **Foresight**

Forecasting • World Futures • System Thinking • Social Change

DEFINE YOUR FUTURE

The Foresight Graduate Program at the University of Houston provides students the tools and training to enter the emerging professional field of foresight, which helps business, government, non-profits and others anticipate and prepare for the future.

PROGRAM:

Offered through the Department of Human Development and Consumer Science, the Master of Science in Foresight is an interdisciplinary, high-tech program that prepares futurists for careers in long-term forecasting and planning. Foresight uses a wide range of theoretical and practical modules to examine the sources, patterns and causes of change and stability in order to map probable, plausible and preferable futures.

A unique and rigorous curriculum emphasizes foresight, creativity and innovation in order to gain competitive advantage in the job market. Students who graduate with a Master of Science in Foresight are consistently placed in professional careers as consulting futurists or working as foresight experts within research organizations and leading corporations, government agencies and NGO's.

SAMPLE OF COURSES:

- Introduction to Foresight
- World Futures
- Systems Thinking
- Social Change
- Futures Research
