

Terry Collins, Adjunct Professor

Terry Collins is a Houston-based Futures consultant and a lecturer at the University of Houston who has appeared on Great Day Houston (Aug 4, 2011 and Aug 23, 2011) talking about foresight and technology.

She co-presented at the World Futures Society in 2012 on “The Evolution of Integral Futures.” In 2010 on “Live Futures: Creating Sustainable Futures through Collaboration and Co-Creation” and also presented “How Futuring is Changing Lives.” In 2008 she did a student presentation at the WFS on “Wind Energy.”

Terry moderated a Futures Panel at the Mensa regional conference: SynRG 2012: Visions

Terry co-wrote with Andy Hines “The Evolution of Integral Futures”, World Future Review Volume 2, Number 3 2010, pp. 5-16 which was based on her Masters Project at the University of Houston.

Terry did research for a published paper on scenario development in Foresight (Bishop, Hines, & Collins), The current state of scenario development: an overview of techniques. which won a Best Paper Award for 2007 from Emerald.

Terry has a B.A. in Philosophy and a M.T. in Futures Studies from the University of Houston.

Terry can be contacted at IntegralFutures@aol.com
